

GPP SOLUTIONS

## Welcome to GPP SOLUTIONS

GPP SOLUTIONS provides a full line of pole-line hardware for use in the distribution, transmission, substation, OEM, and telecommunications market. We provide much more than hardware and insulators, we offer:

- Arresters: Porcelain and Polymer
- Automatic Deadends & Splices
- Bolted Connectors
- Fiberglass Products: Guy Strain Insulators, Cutout/Arrester Brackets and Narrow Profile Arms
- Formed Wire Products: Guy Grips, Distribution & Service Grips, Armor Rods and Line Guards
- Fuse Cutouts: Porcelain & Polymer
- Hardware: Bolts, Pins, Clevis, Brackets, Washers and more
- Hot Line Clamps
- Insulators: Porcelain and Polymer
- Line and Tower Hardware
- Transmission Hardware and Dampers
- OPGW/ADSS Fittings

## About GPP SOLUTIONS

**GPP SOLUTIONS** is a Manufacturer of power-line material used in the electric utility and telecom industry. With sales made in over 50 countries worldwide, our products continue to be approved at some of the largest utilities in the world.

Our product supply consists of material used in the distribution, substation and transmission markets. The staff at **GPP SOLUTIONS** has over 40 years' experience in the utility industry and is well-versed in all areas.

Our distribution warehouse, located in Macon Georgia, is fully stocked with a variety of the products shown in our catalog. Shipments from our distribution center are made within 24 to 48 hours upon receipt of customer order.

In an industry of many changes, **GPP SOLUTIONS** strives to uphold the service that is necessary for our customers to remain competitive. Our products are tested at state-of-the-art independent testing laboratories meeting the standards set forth by ANSI, ASTM, IEEE, NEMA, IEC, and the RUS.

The primary advantage we have over our competition is that we are large enough to supply any volume need, but small enough to supply any customer requirement.

**Our goal is simple:**

To provide top quality products at a competitive price with service that is unmatched in the industry.

# CORONA FREE CLAMPS

## Corona Free Clamp (For Use with Armor Rods)

For distribution construction with all aluminum, ACSR or aluminum alloy conductor. Combination deadend and stirrup or tap clamp.

Stirrup permits tapping energized conductors without arcing damage to the conductor.

Material and installation costs are less with the SOSC combination clamp than with other equivalent methods of deadending and tapping a conductor.

### NOTES:

- (1) Recommended Torque on U-bolts: 3/8"-240 in. lbs., 1/2"-480 in. lbs.
- (2) Lifting eye is standard on keeper for hot line work.
- (3) All bolted deadends are rated 40% of RBS-Partial tension per ANSI C119.4
- (4) For conductor sizes not shown in catalog, consult us

# ARMS, STEEL

### Steel Arms

Steel crossarms are produced from structural steel angle or tubing for high strength deadend and tangent applications.

### Features

- Multiple bolt holes for a variety of conductor attachment points permit assembly of jumper pins and arrester/equipment mounting brackets
- Provided with a center mounting plate for attachment to pole

### Material

Steel hot dip galvanized

# CABLE RACKS

## Nob-Loc Racks

Manufactured from 3/8" x 1 3/4" steel.  
Can accommodate from one to 9 supports.

# PINS ANGLE CROSSARM

## Angle Crossarm

Angle pin brackets can be used for angle construction on crossarms or mounted on the side of poles.

### Features

- Mount with a 5/8" diameter machine bolt
- Pin base is flat for mounting to either a pole or crossarm
- Angle crossarm pins have a smooth base on the bottom for mounting on wood or fiberglass arms

### Material

Pin Body: Ductile iron hot dip galvanized  
Threads: Nylon alloy or lead

The “NLBC” fuse cutout is designed for the most severe working conditions, where electrical and mechanical stresses become critical from the interruption of high fault currents. Designed for outdoor use, the “NLBC” fuse cutout is of a heavy duty design enabling the unit to withstand high torsional forces in opening and closing operations with use of “load buster” tools. The “NLBC” fuse cutout is designed with a fuse link guide which also acts as a fuse holder locking device (flipper) which reduces the tension on the fuse link during the closing operations. Fast expulsion of the link after melting within the fuse tube enables the “NLBC” fuse cutout to operate very efficiently at low fault currents as well. The “NLBC” fuse cutout is fully certified with all applicable IEEE/ANSI/IEC standards and will afford the user many years of trouble free usage.

### DESIGN FEATURES

- High mechanical strength insulator.
- Tin plated parallel connectors.
- Stainless steel spring.
- “Load Buster” hook.
- Silver plated contacts.
- Fuse tube and cutout cast components in bronze.
- Steel hardware and NEMA bracket are galvanized per ANSI/IEEE/ASTM standards.

# PORCELAIN LOADBEAK CUTOUTS 15 KV

The "LBC" fuse cutout is designed for the most severe working conditions, where stress from interruption in short circuits is a relevant factor. Designed for outdoor use, the "LBC" fuse cutout is equipped with husky steel parts to support high torsion forces in closing and opening with use of "Load Buster" tools. Designed with a fuse link guide which also acts as a fuse holder locking device (flipper) thus reducing the tension on the fuse link during the closing operations. Fast expulsion of the link after melting within the fuse tube, makes the "LBC" fuse cutout very efficient in low short circuit currents. Approved in all of the tests specified by ABNT/IEC/ANSI standards, the "LBC" fuse cutout is a proven product.

### DESIGN FEATURES

- High mechanical strength insulator.
- Tin plated parallel connectors.
- Stainless steel spring.
- "Load Buster" hook.
- Silver plated contacts.
- Fuse tube and cutout cast components in bronze.
- Steel hardware and NEMA bracket are galvanized per ANSI/IEEE/ASTM standards.

# PORCELAIN LOADBEAK CUTOUTS 15/27 KV

The "LBC" fuse cutout is designed for the most severe working conditions, where stress from interruption in short circuits is a relevant factor. Designed for outdoor use, the "LBC" fuse cutout is equipped with husky steel parts to support high torsion forces in closing and opening with use of "Load Buster" tools. Designed with a fuse link guide which also acts as a fuse holder locking device (flipper) thus reducing the tension on the fuse link during the closing operations. Fast expulsion of the link after melting within the fuse tube, makes the "LBC" fuse cutout very efficient in low short circuit currents. Approved in all of the tests specified by ABNT/IEC/ANSI standards, the "LBC" fuse cutout is a proven product.

### DESIGN FEATURES

- High mechanical strength insulator.
- Tin plated parallel connectors.
- Stainless steel spring.
- "Load Buster" hook.
- Silver plated contacts.
- Fuse tube and cutout cast components in bronze.
- Steel hardware and NEMA bracket are galvanized per ANSI/IEEE/ASTM standards.

# FUSE LINKS TYPE K

## Type K (Fast) Fuse Links For Distribution Systems through 27kV 23 Inch Length

Quality is important in the protection of overhead distribution systems and their equipment, particularly expensive transformers. These „NLBC” fuse links incorporate the most advanced technology available to yield a high quality, consistent product. These fuse links use approved and pre-tested materials and are the result of years of research in manufacturing and testing. These fuse links are manufactured as per the ABNT/ANSI/NEMA standards and tested with new state of the art procedures to ensure total quality and performance.

**EXPLANATORY NOTES:**

- (1) Nominal conductor size indicates one of various combinations of conductor sizes and jacket thickness within each range.
- (2) Rated holding strengths for all sizes are not practical to publish, due to the multiple combinations of conductor, jacket thickness and type. As a general guide, Distribution Grip dead-ends are expected to approximate the typical test results for coated dead-ends.

EXPLANATORY NOTES:

- (1) Nominal Conductor Size indicates one of various conductors within each range.
- (2) Reference general dimensional information for physical dimensions other than length.
- (3) Add " H " to catalog number for high temperature type (for example HSU 1286H)

Ultimate strength ratings apply to properly installed anchors only.

Failure to install within 5° of alignment with the guy load will significantly lower strength.

Recommended minimum installation depth is 12" in solid rock.

Rods and Wedges are hot dip galvanized.

3/4" Rod Minimum Ultimate Strength of 23,000 pounds.

1" Rod Minimum Ultimate Strength of 36,000 pounds.

SPIRAL VIBRATION DAMPERS ARE DESIGNED TO CONTROL HIGH FREQUENCY AEOLIAN VIBRATION AND ARE PARTICULARLY EFFECTIVE ON SMALL SIZE EARTHWIRES AND CABLES.

THE DEGREE OF PROTECTION NEEDED ON A SPECIFIC LINE IS DEPENDENT UPON LINE DESIGN, TEMPERATURE, TENSION, EXPOSURE TO WINDFLOW AND VIBRATION HISTORY ON SIMILAR CONSTRUCTION IN THE SAME AREA. THE FOLLOWING RECOMMENDATIONS MAY BE USED AS A GENERAL GUIDE.

- \* 100-250M, 2 PER SPAN (ONE ON EACH SIDE OF SUPPORT POINT)

# STOCKBRIDGE VIBRATION DAMPER & ARMOR GUARDS

THE STOCKBRIDGE VIBRATION DAMPER IS DESIGNED TO CONTROL HIGH FREQUENCY AEOLIAN VIBRATION AND IS SUITABLE FOR OPERATION WITHIN AN ENERGIZED ELECTRIC FIELD. THEY ARE SUPPLIED COMPLETE WITH A SET OF LINE GUARDS FOR DIRECT INSTALLATION OVER THE OPGW OR ADSS OR WITH A SPECIFIC SIZED CLAMP FOR INSTALLATION OVER THE ARMOR RODS OF SUSPENSION AND DEAD END FITTINGS.

# JOINT BOXES

## PLASTIC JOINT BOX FOR ADSS

The Plastic Joint Box for pole ADSS

The Plastic Joint Box for tower ADSS

THE PLASTIC JOINT BOX FOR ADSS FEATURES DURABLE HIGH-DENSITY THERMOPLASTIC SHELLS THAT WEIGH LESS THAN THE METAL COUNTERPARTS. FOR LOOSE TUBE BUFFER TYPE FIBER, IT HANDLES UP TO 96 SPLICES. IT INCLUDES 2 PORTS TYPE AND 4 PORTS TYPE FOR SELECTION.

## METAL JOINT BOX FOR OPGW AND ADSS

The metal Joint Box for pole

The metal Joint Box for tower

THE METAL JOINT BOX FOR OPGW AND ADSS FEATURES CORROSION-RESISTANT ALUMINUM ALLOY SHELLS. FOR LOOSE TUBE BUFFER TYPE FIBER, IT CAN MANAGE UP TO 114 FIBER SPLICES. THE BOX ALLOWS FUTURE EXPANSION OR "GROWTH" INTO THE BOX WITH MINIMAL COST OR DISRUPTION TO THE EXISTING FIBERS. IT INCLUDES 2 PORTS TYPE AND 3 PORTS TYPE, 4 PORTS TYPE, 5 PORTS TYPE FOR SELECTION.

## CABLE STORAGE ASSEMBLIES

THE CABLE STORAGE ASSEMBLIES PROVIDE A METHOD FOR STORING ADSS OR OPGW CABLE ON WOOD POLES, METAL POLES, CONCRETE POLES, AND LATTICE TOWERS. THE BASIC KITS CAN BE COMBINED INTO VARIOUS CONFIGURATIONS TO SUIT YOUR SPECIFIC APPLICATION.

AVAILABLE LENGTHS: 660mm,1000mm,1200mm

**GPP SOLUTIONS** is a global supplier of power line materials used in the utility and telecom industry. With sales made in over 50 countries worldwide, our products continue to be approved at some of the largest utilities in the world.

In an industry of many changes, **GPP SOLUTIONS** strives to uphold the service that is necessary for our customers to remain competitive. With over 40 years experience in the utility industry, our staff is very

capable of handling your many requirements. GPP products are tested at state of the art independent testing laboratories, meeting the standards set forth by : ANSI, ASTM, IEC, and RUS. Samples from each production run are tested as part of our quality control. Our primary advantage we have over our competition is that we are large enough to supply any volume need, but small enough to supply any custom requirement.

**Our goal is simple:** *To provide top quality products at a competitive price with a service that is unmatched in the industry.*
